

# BCT Contact Center

Enhance Customer Contact

Contact Center

**UNIVERGE® Business Connect**, NEC's versatile all-in-one Unified Communications & Collaboration (UC&C) suite, integrates all communication streams and presents them in a single view, giving employees control over how and when to be contacted, via a choice of devices – in the office, at home and on the move. Business Connect includes call control, presence, voicemail, operator and directory services, as well as a comprehensive contact center.

## Multi Media

> Single point of contact; efficient multi-channel interaction via telephone, web chat or email.

## Connect customers to the right agent first time

> Route calls, web chats or emails to the best skilled agent based on the requested service or language of the customer;  
> Route important customers always to the same agent.

## Reduce waiting times and lost calls

> Estimated waiting time or position in queue information, provides callers the possibility to make an informed decision to be called back or leave a voicemail.

## Increase Productivity & Performance levels

> Real-time Supervisor Dashboard, Soft Wallboard and Reporting provide important metrics to optimize your Contact Center.  
> Agents can request supervisor assistance by a single click.  
> Supervisors can manage and coach agents by silently monitoring and barging into live conversations.  
> Customer interaction history is automatically displayed to the Agent so they are well informed before every call connects.

## Offer 24/7 services and remote agents

> Customers can be transferred, even during out of office hours;  
> Alternatively, they can get the option to be called back or leave a voicemail;  
> Agents can work from any location: in the office, on the road or from home. The special BCT Agent App can be used on a mobile phone to make agents available from any location.

## Personalized and accurate responses lead to revenue growth

> Detailed customer information visible via the agent user interface.

## Minimize the impact on resources

> Little or no user training, Intuitive User Interface.  
> Easy to deploy, customize and self-maintenance.

## Scalability to accommodate for future growth

> Add agents, Supervisors Operators and Features by simply adding concurrent licenses. If you decide to upgrade you won't need to redeploy anything. One stop shopping, all in one box!
